

25Delta Absolute Return Strategy

FOR QUALIFIED INVESTORS ONLY | FACTSHEET MARCH 2025

The Companies

Investment Manager

QCAM Currency Asset Management AG is an independent Swiss financial services provider that focuses primarily on currency and money market management for institutional clients. QCAM is regulated by the Swiss Financial Market Supervisory Authority FINMA and the U.S. Securities and Exchange Commission SEC.

Investment Advisor

25Delta EAF is an independent financial advisory firm dedicated to help professional clients to improve their risk management techniques and alpha seeking in global markets, with focus in FX markets. The advisor & sponsor to the 25Delta Absolute Return Fund seeks to replicate there the strategies successfully implemented during +20 years by its founder. 25Delta EAF is regulated by the Spanish Comisión Nacional del Mercado de Valores (CNMV).

The Strategy

25Delta Absolute Return Strategy is a discretionary investment program that seeks constant monthly returns by exploiting the risk premium available in the FX volatility markets by selling FX options within the G4 currency space (USD/EUR/JPY/GBP). This risk premium is time-varying and thus can vary or have less extracting value for some time. For this reason the investment manager can reduce the risk. Risk Management activity includes not just reducing the maximum 3 times leverage but also a proactive delta hedging activity via FX forwards.

The strategy is re-compiled monthly and aims to achieve consistent positive monthly returns. The main objective of the strategy is capital preservation, and the expected holding period should be longer than 1 year.

Manager Comment

The 25Delta Absolute Return Fund's performance in March was +0.23%.

In March, markets continued to unwind the Trump trade. Germany's historical decision to lift the debt brake and increase government spending contributed to a sharp USD sell off against the EURO, a sharp rise in 10yr bunds and the DAX index.

Volatility continued to move higher during the month for interest rates and FX markets. Monetary Policy decisions were as expected for the FED, the BOE to hold and the ECB to cut 25bps, summing up 150bps of cuts since last summer.

US Inflation numbers were softer in February compared to January but the uncertainty about the impact of the upcoming trade war on inflation made Mr. Powell to reiterate the FED's stance to wait and monitor the evolution of politics before making any policy adjustments.

Our strategies were implemented in three rounds and managed to get a positive outcome after a bad month for other assets, confirming the negative correlation of our fund and marking the 19th consecutive month of positive performance.
