

25Delta Absolute Return Strategy

FOR QUALIFIED INVESTORS ONLY | FACTSHEET JUNE 2025

The Companies

Investment Manager

QCAM Currency Asset Management AG is an independent Swiss financial services provider that focuses primarily on currency and money market management for institutional clients. QCAM is regulated by the Swiss Financial Market Supervisory Authority FINMA and the U.S. Securities and Exchange Commission SEC.

Investment Advisor

25Delta EAF is an independent financial advisory firm dedicated to help professional clients to improve their risk management techniques and alpha seeking in global markets, with focus in FX markets. The advisor & sponsor to the 25Delta Absolute Return Fund seeks to replicate there the strategies successfully implemented during +20 years by its founder. 25Delta EAF is regulated by the Spanish Comisión Nacional del Mercado de Valores (CNMV).

The Strategy

25Delta Absolute Return Strategy is a discretionary investment program that seeks constant monthly returns by exploiting the risk premium available in the FX volatility markets by selling FX options within the G4 currency space (USD/EUR/JPY/GBP). This risk premium is time-varying and thus can vary or have less extracting value for some time. For this reason the investment manager can reduce the risk. Risk Management activity includes not just reducing the maximum 3 times leverage but also a proactive delta hedging activity via FX forwards.

The strategy is re-compiled monthly and aims to achieve consistent positive monthly returns. The main objective of the strategy is capital preservation, and the expected holding period should be longer than 1 year.

Manager Comment

The 25Delta Absolute Return Fund's performance in June was +0.29%

June ended one the most tumultuous quarters in record, dominated by trade and geopolitical news, although with more orderly volatility than April and May. Risk assets ended in a positive tone and the USD index marked its worst first half since 1973.

Easing fears of a US recession, after expansionary PMI data, and resilient labour markets joined good CPI numbers to boost US equities and bond markets till the end of the month.

FED paused for another meeting with Mr. Powell sounding hawkish in his appearance before the press and the US air raided Iran nuclear facilities in an unprecedented move.

Nothing prevented the USD to continue to slide to end the month above 1.17's (DXY -2.5% & EURUSD up +3.9% on the month), with new flows came to the market as foreign investors increased long time low FX hedge ratios seen as the major driver in the last moves. Renewed US fiscal concerns and another Mr. Trump interference in FED independence did not help either.
